Software Developer

Fulcrum Software Solutions is looking for a self-motivated and ambitious Software Developer to work in a highly collaborative and hands-on environment. Software Developers at Fulcrum participate in all aspects of the software development lifecycle. Projects are in a variety of technologies with the main focus being Microsoft .NET and Web Sites.

Responsibilities

- Complete independent software development tasks assigned by project lead against specified project time frames, quality, and requirements
- Conduct unit, integration, and system testing on own code and fix errors
- Develop and execute test plans
- Troubleshoot and fix defects in existing systems as assigned
- Develop components of overall solutions using iterative and fast prototyping methodologies
- Participate with team in design sessions
- Provide escalation support for technical issues from customers

Required

- BS in Computer Science or equivalent
- Excellent problem solving skills
- Relational database query skills including database design and maintenance (Microsoft SQL preferred)
- Experience developing using Microsoft tools for Microsoft platforms
- Ability to work well both independently and as a member of a team
- Ability to work on multiple project teams simultaneously
- Good verbal and written communication skills

Desired

- Commercial software development experience using .NET
- Commercial web site development experience using Word Press
- Mobile application development experience for IOS and/or Android platforms
- Experience with client side web technologies like javascript and jquery
- Experience with Microsoft based Web Applications and Web Services
- Experience with a version control system and configuration management
- Creative and Design skills utilizing Adobe products
